Summary

An experienced engineer and manager, master of science in math and computer information systems, technical architect, bilingual, possessing strong analytical skills, diverse practical experience in systems design and software development, hardworking and passionate about concepts, research and new technologies, loves challenging projects, thinking outside of the box and cutting-edge solutions.

Interested in a challenging position in a major software or consulting company, preferably involving scientific background, research, conceptual development and/or work in the field. The area of interest includes but not limited to relational and non-relational databases, modeling, development technologies, mission-critical transactions, MRM, ERP systems, business intelligence and web technologies.

Skills and professional experience

System analysis and design:

- Distributed and client-server applications, Web applications and services, rich internet applications
- Enterprise database development and design, service-oriented architecture, proprietary systems
- Scrum, XP, agile development

Software development:

- *Programming languages:* Java, C#, C++, C, Perl/OO-Perl, JavaScript, VB, Shell
- *Integrated development:* TFS, Visual Studio, Eclipse and add-ons, NetBeans, JBuilder, SVN/VSS/CVS
- *Modeling:* UML, E-R, Patterns, formal code generation, reactive schemas, ...
- *Frameworks:* .NET, JSF/JSP, Struts, Hibernate, Spring, SharePoint, EJB, numerous minor libraries...
- *Web Development:* HTML/CSS/XHTML, AJAX/ExtJS/JQuery/DOJO/YUI/JSON, RIA, ASP.NET/ISAPI, JSF/JSP/Struts/Spring, SOAP/XML-RPC IBM WebSphere, BEA WebLogic, JBoss, Tomcat, ...
- *RDBMS:* database analysis and design assessments, triggers/stored procedures, ODBC/JDBC/CLI/etc APIs, query performance and access optimization, data cleansing and integrity enhancements, maintenance planning and administration, optimization and design of data access layer, data layer mapping;
- *Data:* advanced SQL/T-SQL, XML/XSD/DTD/XSLT, DB4O/OODB, Non-relational

Systems & Integration:

- Application and web servers: IBM WebSphere/BEA WebLogic/Apache Tomcat/Resin, IIS, Apache
- Relational databases: Microsoft SQL Server, Oracle, DB2, Teradata, Netezza, Portgress, Firebird, Interbase, Cloudscape, MySQL, Sybase, ...
- MRM applications: Affinium Campaign, Model, E-Message, Affinium Plan, ...
- Operating Systems: Microsoft Windows, Linux/UNIX (AIX, HP-UX, Solaris, Linux, FreeBSD)
- Virtualized environments: VMWare, Hyper-V

Languages:

- Russian: native
- English: fluent

VIAcode LLC (Nov 2010 – present, Hartford, USA), solutions unit manager
